Operational delivery — real platform for customers

Policy: Delay public rollout until customers get durable Cloud-backed operations (not browser-only tenancy).

Locked: ADR-032 / ADR-033. Public sample /demo retired → /product. Soft marketing via /product / /trial / leads.

GO LIVE	Operational grade	DONE

Step 1 — Frappe SoT ready (DONE — 2026-07-22)

Customer + Owner User smoke passed (nonunu@trustledger.co.za).

Step 2 — Product DocTypes + Cloud File (DONE — 2026-07-22)

DocTypes + Project/Incident/Evidence smoke under Step1 Smoke Test passed.

Step 3 — Sync + auto-provision (DONE — 2026-07-23)

Paystack creates Customer+User without Ops click.

Step 4 — Billing ops + lift lockdown (DONE — 2026-07-23)

Day-14 charge cron + entitlement gate live. PLATFORM_OPERATOR_ONLY=0; buyer /login/live smoke passed. Ops stay allowlist via PLATFORM_OPERATOR_EMAILS.

Step 5 — V002 operational depth (DONE — 2026-07-23)

UI modules shipped: 24c Engagements · 24d Commitments · 24e Grievance verify/close · 24g Intelligence/ESG.

Active after GO LIVE: Cloud Stakeholder / Engagement / Commitment DocTypes + live BFF (ADR-033). Deferred: Stats SA ingest; live Grok via srm-core.

GO LIVE — operational grade (DONE — 2026-07-23)

Ops ladder: <https://trustledger-frontend-pi.vercel.app/ops/readiness> — **GO LIVE ready** confirmed by operator.

Criterion	Required	Status
Owner provision automated or one-click Ops	Yes	Met (auto-provision + Ops tools)
Customer data on Cloud, not browser-only	Yes	Met (TL DocTypes + migrate)
Media on Cloud File	Yes	Met (upload BFF)
Day-14 billing without babysitting	Yes	Met (cron + Finance panel)
ADR-013 lifted for buyers	Yes	Met (PLATFORM_OPERATOR_ONLY=0)
Sample demo retired (/demo → /product)	Yes	ADR-033
No demo INC-* in customer live workspace	Yes	Met (buyer live smoke)

TrustLedger is operational-grade for paying customers. Active: Cloud Stakeholder Intelligence (DocTypes + live CRUD). Deferred: Stats SA ingest; live Grok via srm-core.
